The Sangean waterproof H201 radio allows you can enjoy your morning news, your favorite radio show, stock and financial news, or your local ball games. Unlike other shower radios, most of which are just water resistant; the Sangean H201 is made with JIS7 standard, which is waterproof. This radio is submersible and meets waterproofing standards that are equal to marine radios. It is so versatile that you can enjoy your radio programs while showering, take it on a fishing trip, take it to the beach, and never be afraid of water or sand damaging your radio. If you get caught in the rain, it doesn't matter. If you drop it off your boat while fishing, this radio will float.

This radio has a loud audio that sounds great, excellent reception quality, extremely portable, and runs on two "D" cell batteries that will last a long time without having to change them. The push-button controls and waterproof speaker are impervious to any wet environments. Built with a sturdy, white cabinet, this radio has 5 digital presets for each band (AM/FM). You can easily lock into your favorite stations without relying on inaccurate dial tuning.

Other great features include set time (1 to 120 minutes), LED flashlight, battery level indicator, large LCD read out clock, emergency buzzer, plus other features. Who could ask for much more...If you are looking for a top of the line, all around radio look no further.
