

DT-210

FM-Stereo / AM
PLL Synthesized Pocket Receiver

Color

Silver

Simple quality, simple to use functions, and simply great design. Keep up-to-date on the latest news, weather, traffic, sports scores, & much much more with this ultra-portable pocket radio from Sangean. Weighing a mere 3.9 ounces, the DT-210 is a small PLL-synthesized AM/FM stereo radio small enough to fit in a shirt or jacket pocket and powerful enough to pull in those distant AM/FM stations. A built-in speaker affords headphones-free listening, and 90-minute auto shut-off lets you fall asleep to the radio without fear of waking up to dead batteries. With Phase Loop Lock Digital Tuning and Sangean's traditional radio sensitivity, built-in speaker and included ear buds, you will be able to enjoy your morning jog, your short trip to the beach or other outing without missing your favorite AM/FM station if you have the DT-210 pocket radio. You get 25 memory presets (and auto scan) to help you zip right to preferred stations. The radio comes with stereo ear buds and a removable belt clip, as well as a trailing antenna. DBB (Deep Bass Boost) enhances the sonic low end, while a stereo-mono switch improves reception when needed. Measuring a mere 1.5 by 3 by 0.6 inches, the unit runs on two AAA batteries (not included). A low-battery indicator offers a helpful hint on when it's wise to carry replacements.

Main Features
